

PROFILE

Product-minded technology professional with 5+ years of experience across quality engineering, data analytics, and enterprise technology, backed by a Product Management and Agentic AI certification from IIT Patna. Skilled at translating business needs and user insights into data-driven product solutions through stakeholder collaboration, PRD development, and Agile delivery. Designed AI-first products from problem discovery to MVP through user research, feature prioritization, UX design, analytics, and iterative validation. Recognized for taking on QA leadership responsibilities early in career and for transforming complex data into actionable product decisions.

EDUCATION

Certification in Product Management & Agentic AI, Vishlesan i-Hub, Indian Institute of Technology, Patna **2025–2026**
2-semester program with proctored assessments and a capstone project; awarded Certificate of Excellence in Evaluations.

Bachelor of Technology in Electrical Engineering, GGSIPU, Delhi **2017–2021**
CGPA: 8.8 (Top 5%) | Published research on IoT and Machine Learning (ML)-based Safety Monitoring in SSRN, ICAST 2021

SKILLS

Product: Product Strategy, Product Discovery, PRD, Product Roadmapping, Feature Prioritization (RICE, MoSCoW, Kano), Go-to-Market Strategy, Agile & Scrum

Research & Design: User Research, Competitive Analysis, Persona Development, Customer Journey Mapping, Wireframing, UX Design

AI & Analytics: AI Product Design, Generative AI, Agentic AI, Prompt Engineering, LLM Applications, Product Analytics, SQL, Tableau, Python

Tools: Figma, Jira, Notion, Mixpanel, Lovable, Hugging Face, GitHub

EXPERIENCE

Tata Consultancy Services (TCS) **Aug 2021–Present**
Data Analyst (June 2023–Present)

- Partnered with three cross-functional stakeholder teams supporting a leading U.S. healthcare payer to deliver 10+ Tableau dashboards consumed internally and by pharmaceutical manufacturer partners, reducing manual reporting effort by 30%.
- Consolidated 6 static drug-billing and reporting dashboards into a single dynamic, filter-driven self-serve dashboard, eliminating maintenance of multiple static reports.
- Resolved 50+ data tickets by optimizing SQL queries and data-source relationship models, improving dashboard performance and reliability.
- Designed automated operational dashboards to monitor Talend ETL pipelines, surfacing job failures in real time and eliminating manual health checks.
- Led the analytics workstream by mentoring two junior analysts, coordinating sprint deliverables, tracking delivery metrics, and ensuring timely execution across releases.

Quality Engineer (Aug 2021–June 2023)

- Recognized for taking on QA leadership responsibilities within the first year after building deep expertise in a clinical prescription-review system that flagged drug-allergy, pregnancy, and age-based prescribing conflicts for pharmacist review.
- Partnered with the Product Owner on backlog refinement — authoring user stories and Given/When/Then acceptance criteria to ensure requirements were clear, testable, and aligned with business intent.
- Built a Python-based chatbot consolidating JIRA/Confluence documentation, standardizing onboarding and cutting manual dev-QA requirement clarification effort by 15%.
- Delivered recurring sprint demos to 50+ client stakeholders and product owners, earning consistent recognition for clear articulation of feature functionality and outcomes.

PROJECTS

- **MAISON — AI Fashion Stylist App (PM Case Study)** [GitHub](#) | [Live Prototype](#) | [Stakeholder Walkthrough](#)
Owned end-to-end product lifecycle for an AI-powered outfit-recommendation platform — discovery, personas, PRD, RICE/MoSCoW prioritization, and Responsible AI design. Defined a North Star metric and experiment design; shipped a functional MVP with GTM strategy.
- **FocusBuddy — AI Productivity App (PM Capstone)** [GitHub](#) | [Live Product](#) | [Stakeholder Walkthrough](#)
Led problem discovery, persona development, and PRD authorship for an AI-powered focus app for students — prioritized features using RICE/MoSCoW and defined OKRs to guide the roadmap.

Additional case studies (CampusConnect, MovieMate, and more): github.com/VarshaJha-14

ACHIEVEMENTS

- Tableau Desktop Certified — Salesforce (2025)
- Data Analysis — Coding Ninjas (2023)
- Google UX Design Professional Certificate (2022)
- Elevate Wings Fast-Track Promotion, TCS (competitive exam/interview; skipped standard 3-year promotion cycle)
- Certificate of Excellence for Outstanding Performance
- On-the-Spot Award for showcasing best work
- Best Team Award
- Top 20 teams in Gov-TechThon-2020
